2nd Semester Back Examination 2017-18
DATA STRUCTURE USING C

BRANCH : AEIE, AERO, AUTO, BIOMED, BIOTECH, CHEM, CIVIL, CSE, ECE, EEE, EIE,
ELECTRICAL, ENV, ETC, FASHION, FAT, IEE, IT, ITE, MANUFAC, MANUTECH,
MARINE, MECH, METTA, METTAMIN, MINERAL, MINING, MME, PE, PLASTIC, TEXTILE

LectureNotes.in

Time : 3 Hours

Max Marks : 70

Q.CODE : C704

Answer Question No.1 which is compulsory and any five from the rest.

The figures in the right hand margin indicate marks.

Answer all parts of a question at a place.

- Q1** Answer the following questions : (2 x 10)
- a) Define Data Structures and its types.
 - b) List out the advantages of using a linked list.
 - c) How can you check whether if binary tree is height balanced or not ?
 - d) State the difference between queues and linked lists.
 - e) List out the applications of a linked list.
 - f) State the difference between arrays and linked lists.
 - g) Difference between Abstract Data Type, Data Type and Data Structure.
 - h) Define a complete binary tree.
 - i) State the different ways of representing expressions.
 - j) What are the categories of AVL rotations?
- Q2** a) Write an algorithm for inserting and deleting an element from doubly linked list? (5)
b) Write a program to implement the insertion & deletion operation in a linear queue. (5)
- Q3** a) Explain linear linked implementation of Stack and Queue? (5)
b) What is a Queue? Explain its operation with example? (5)
- Q4** a) Convert the following infix expression to prefix notation (5)
E: $(A+B*C*(M*N^P+T)-G+H)$
b) Evaluate the given expression postfix expression (5)
E: $ABC*D/+$ where $A=2$, $B=3$, $C=4$, $D=6$
- Q5** a) What is a tree? Describe the terminologies used in tree. (5)
b) Construct a tree from a given postfix expression using stack (5)
E: $A\ B\ +\ C\ D\ E\ +\ * \ *$
