With Internet Lock, you can fully control the internet connections and programs on your computer.. How to Block An Application from Accessing the Internet with Windows Firewall by Jason Fitzpatrick on July 25th, 2017 Most of the time we want our applications online and connected to both our local network and the greater Internet.. What I would like to do is to completely block two computers on my home network from accessing the Internet during a given time of day.. • Block internet websites • Prevent users or groups from accessing internet.. Examples: • Only allow users to access internet every day 9:00 AM - 7:00 PM • Block internet access every Saturday and Sunday.. By using multiple rules, you can: • Allow a specific web browser while blocking all others.. So say we got a computer A, a computer B and a computer C We want to allow computer B and computer C to access the Internet (the WAN side of the network) from 07:00 to 16:00. cea114251b [Movavi Video Converter 7.2 Serial Key](#)
